

Intermittent Closed Catheterisation System

Our Closed Catheterisation System is sterile and pre-lubricated with a hydrophilic gel, so no additional preparation is needed. The system works like a traditional Nelaton Catheter and provides a simple catheterisation that reduces the risk of urinary tract infections.

- ⊗ Integrated 1500mL bag
- ⊗ Sterile closed system reduces the chance of infection
- ⊗ Pre-lubricated for simple insertion
- ⊗ DEHP, BPA and latex free
